**Color Selection
Collection for
Prefabricated Wall Panels**

Company Introduction

Tian an New Materials was founded in 2000 and listed on the Shanghai Stock Exchange in 2017. For many years our company has embraced a green, ecological, and efficient industrial prefabrication strategy for interior design and construction. We offer comprehensive system solutions encompassing materials, design, and construction. Our company boasts its own brand and supports OEM/ODM services. With two decades of experience serving major clients and a robust service system, we ensure exceptional service. Our dedicated, professional team serves hundreds of home decor, real estate, and automotive brand enterprises across China. The company is committed to research and innovation, having filed numerous invention patents globally to underpin technological advancements and quality assurance in our products. Tian an New Materials is certified under the ISO 9001, ISO 14001, ISO 16949, and ISO 45001 systems and adheres to rigorous APQP and FMEA development and quality control processes, thereby guaranteeing consistent product quality.

Our company specializes in a variety of products for indoor quick installation and refurbishment, including strip panels, imitation marble slabs, metal plates, 3D molded panels, and wall covering products. The primary materials used in these products are bamboo fiber, carbon fiber, polymers, and calcium carbonate, among others. They are secured together using PUR hot melt adhesive and finished with eco-friendly materials such as PVC/PP/TPU. Our range of products is diverse in style and color, and we offer customization services. They are environmentally friendly, easy to install, and boast stable performance. They are resistant to deformation, offer a long lifespan, and are impervious to moisture, water, sound, wear, scratches, stains, and weather conditions. These products are ideal for new construction or refurbishment in entertainment venues, commercial spaces, office buildings, hotels, hospitals, schools, apartments, and villas.

Our company boasts over 20 years of experience in serving major clients, offering tailored product development services, and maintaining a holistic suite of product, sales, design, construction, and training services to facilitate seamless new product collaborations. Additionally, we excel in integrating multiple categories and delivering comprehensive wall system solutions, encompassing material development, selection product design refinement, and construction services, thereby empowering our clients with a one-stop service offering.

A photograph featuring a heavy, draped fabric in a warm beige or taupe color. The fabric is gathered at the top and flows down, partially covering a large, rounded ottoman. The ottoman has a textured, ribbed surface in a darker, muted brown color. The background is a plain, light-colored wall, and the lighting is soft and directional, creating subtle shadows and highlights on the fabric's folds and the ottoman's texture.
